PEH ATTA JOSEPH

Delivery Leadership | Scrum Master | Technical Engineering Management

Accra, Ghana | pehjos4@gmail.com | +233596188679 | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Ghana-based software delivery professional, Scrum Master and founder with six years of experience contributing to product delivery since 2020, spanning frontend development, Agile coordination and technical engineering management. Aligns business priorities with team execution across enterprise systems, fintech and digital learning. Coordinates cross-functional teams, removes delivery blockers and strengthens accountability through clear communication, structured follow-through and continuous improvement. Brings technical judgment, stakeholder collaboration, mentoring and remote delivery experience relevant to supporting fjorge's Ghana Product Delivery organization.

CORE SKILLS

Agile and Scrum delivery • Leadership through influence • Stakeholder communication • Cross-functional coordination • Delivery tracking and blocker resolution • Team mentoring • Onboarding documentation • Process improvement • Client integration experience • Release coordination • Technical quality standards

EXPERIENCE

AmaliTech GmbH - Scrum Master / Frontend Engineer

Kumasi, Ghana | Hybrid | September 2021 - Present

- Facilitate sprint planning, daily stand-ups, reviews and retrospectives, helping teams understand priorities and maintain accountability for delivery.
- Coordinate developers and stakeholders to clarify business requirements, align sprint work with objectives and remove blockers to execution.
- Track sprint progress, backlog items and team velocity; maintain delivery documentation and follow up on continuous improvement actions.
- Lead frontend delivery for the ICON resource management system, supporting an 80% improvement in employee and resource management efficiency.
- Contribute within a 10-member team delivering an internal ERP system, supporting a 60% improvement in employee management and 30% cost savings.
- Collaborate with two backend developers on a data migration service, improving reliability and reducing migration risk by 80%.

Pehxel - Founder / Technical Engineering Manager

Accra, Ghana | Remote | June 2023 - Present

- Lead engineering direction and product execution for digital learning, meetings and real-time collaboration solutions.
- Coordinate delivery across five core workflows: whiteboards, video conferencing, breakout sessions, annotation and session recording.
- Translate learning and collaboration needs into live classroom capabilities, including digital boards, stylus support, live lessons and video feeds.
- Direct delivery of AI-enabled notes, quizzes, summaries, attendance tracking, participation insights and performance reporting.

Kudi Systems - Delivery Coordination and Engineering Quality

Senior Frontend Engineer | June 2025 - January 2026 | Accra, Ghana | Remote

- Coordinated collaboration across a 30-developer team using Jira and Miro to support planning, issue tracking and faster delivery cycles.
- Improved customer SDK integration success by 70% through payment implementations across React, Vue, Angular and HTML environments.
- Created onboarding and training documentation, improving employee training efficiency by 30% and reducing customer integration friction.
- Championed engineering standards that improve code quality and maintainability by 40%; supported CI/CD workflows that reduced deployment time and release errors by 35%.

SP Pay Solutions Limited - Client Product Delivery

Senior Frontend Engineer Consultant | February 2024 - June 2025 | Accra, Ghana | Remote

- Delivered web applications and media administration platforms, translating product needs into responsive interfaces and publishing workflows.
- Improved user engagement by 80% through web application delivery and improved system response time by 80% through API integration and performance optimization.

Forecastmall - Senior Frontend Engineer

Accra, Ghana | Remote | May 2020 - January 2024

- Resolved application defects and improved frontend stability, contributing to a 70% increase in mobile app adoption.
- Developed and tested applications using React, Next.js, React Native, Node.js and MongoDB; contributed to 40% faster Nextgen prototype development.

Hookwal News App - Full Stack Developer

Project experience | January 2020 - May 2025

- Developed a responsive news application with Node.js and Next.js, contributing to a 40% improvement in user experience.
